

Datasheet // LineLite series

PowerIN Line

The Stogger PowerIN Line is developed to provide power to the Stogger LiteStrip. The LiteStrip is designed to apply in-line LED lighting in an easy and very fast way. It can also be used to interconnect, or daisy chain multiple LiteStrips.

Key Features

- PowerIN Line module for providing power to the LiteStrip
- Can be used to interconnect 2 LiteStrips
- Rated for 100 Quantum Line modules (or its electrical equivalent)
- Accepts 24AWG power cable

Technical specifications

Maximum electrical current	2 A
Maximum voltage	100 V
Max connected LED modules	100
Dimensions (LxWxH)	30x15x8 mm
